Approved Proposal Content:

Organization Overview

Iron Crown Dentistry is a dentist practice that offers preventive, restorative, cosmetic dentistry services. Founded in 2018 by **Jon Snow**.

Mission Statement

“Make dentistry available to people from underdeveloped communities “

Vision Statement

“Become leading dentistry with most built practices in underdeveloped communities”

Target Audience

- Students
- Elderly people
- Families

Website Goals and Objectives

Goals for website:

- Make website effortlessly obtainable when searching for it on the internet by utilizing SEO
- Make it easy for users to understand content on the website
- Produce a user-friendly website that will urge new patients to make appointment bookings
- Credibility (Hosting and domain)

Performance KPIs to measure success:

- **Tracking website:** Monitoring how many patients book appointments.
- **Monitor appointment no shows:** Help business figure out where they lack and how they can do better.
- **Identify dentistry's business costs:** which will help understand where money goes and help business allocate funds accordingly

Current Website Analysis

- Iron Crown Dentistry doesn't have an existing website.

Proposed website features and functionality

The website features and functionality that the Iron Crown will have are:

- A landing page (Home page)
- About us (Details about business including mission and vision statements)
- Testimonials (Reviews from clients)
- Services Page (The services the practice is going to offer)
- Enquiry Page
- Interactive tool (WhatsApp feature for easier communication)
- Appointment booking page

Design and user experience

- Iron Crown Dentistry will have cool green soft tones. The website will have polished and concise fonts like raleway and mulish fonts that are both elegant and modern.
- The goal is to have a website that is calm, inviting, friendly, to help users not deal with a confusing website when they already have stress about their teeth.

Wireframes

Iron Crown Dentistry — Website Wireframes

Design Notes

Low-fi wireframe kit

Structure and LUX flow only. Visual polish comes later. Shapes = image placeholders, lines = text, filled pills = buttons.

Palette

Cool sage greens + soft lavender accent

Typography

Rubbery — headings (elegant)

Mulish — body (modern, readable)

Tone

Calm, inviting, friendly. Reduce dental anxiety through generous whitespace, soft colour, warm imagery, and simple navigation.

Layout rules

- Persistent top nav on every page
- One clear primary CTA per screen
- WhatsApp bubble bottom-right, always visible
- Rpt spacing, generous line height

Low fidelity wireframes. Focus is on structure, content hierarchy, and user flow — not visual design. Colours and fonts are called out for the design phase.
